## EXPERIENCE

### FluentT

AI-based 3D Avatar  
Generation

*Backend Developer*  
NOVEMBER 2023

#### *Project: in-house admin system*

- Developed RESTful APIs to handle media file information proficiently
- Implemented direct media file uploads to S3 utilizing Multer, saving links in RDS
- Collaborated with the development team, actively contributing to daily scrum meetings

### WeCode, Seoul

Offline Bootcamp

*Backend Developer*  
AUGUST - NOVEMBER 2023

- Cloned social media and commercial websites by recreating backend logic and database structure
- Designed and developed a fully operational home fitness platform from scratch using RESTful APIs and successfully deployed through EC2/RDS
- Collaborated with frontend/backend developers on team projects

### Globaleur, Seoul

Silicon Valley-based  
digital travel startup

*Content Editor*  
APRIL 2021 - JULY 2023  
Seoul, Hybrid

#### *Seoul Tourism Organization (STO)*

- Published articles using HTML and CSS, registered 40 new travel data points, and updated 20 existing entries monthly on STO's CMS
- Increased web traffic through alt text, meta descriptions and tags, keyword analysis, and off-page promotion (SEO)
- Managed a promotion event, attracting 700+ new users with less than \$50
- Elevated content quality by translating travel-related articles

#### *In-house content portal*

- Led an international team of interns achieving a goal of registering 400 new POIs in a month
- Devised user flows and frameworks for the company's new services
- Engaged in brainstorming sessions for government projects and prepared pitch decks
